 An automobile something after the type of a cyclo, made by Louis Tracy of this city during the past winter and spring, has created considerable attention about the city streets for the past day or so and, according to those who have had a ride in it, has all the power of a motor car. Mr. Tracy assembled the car in his spare time, using a Ford engine for the motive power. The body is of rock maple, and the wheel base 37 inches. ## OVER \$2,000 NEEDED

To Carry on Work of United Charities Association.

According to the budget prepared by Miss Nancy Austin, secretary of the United Charities association, the estimated expenses for the first year of the society's existence will be slightly over \$2,000, while the receipts figure up to \$1,600. The amount received from membership will be \$400, from the town \$950, and from voluntary contributions \$300. The expenses, it is expected, will be the following: Secretary's salary \$1,200, rent \$144, electricity \$15, mail station \$200, general relief \$400, office expense \$25.

The deficit is about what is estimated for general relief, and the bulk of

the rest is fixed expenses. It is not to be inferred that the proportion between the amounts will remain at this ratio, nor are the figures given certain. It is hoped that a much larger amount may be placed at the disposal of the organization. Then the town is giving aid in deserving cases, and much personal and organized charity will be distributed through the association. So that it is not fair to make comparisons until the year's work is concluded and a general balance is taken.
